ABYSSA NOUVELLE-CALÉDONIE

UNDERWATER EXPLORATION REINVENTED THROUGH DEEP AUTONOMOUS DRONES

FOUNDER(S): Lionel LOUBERSAC

TYPE OF ACTIVITY: B to B

SECTOR: Marine

MATURITY: Acceleration / Scale-up

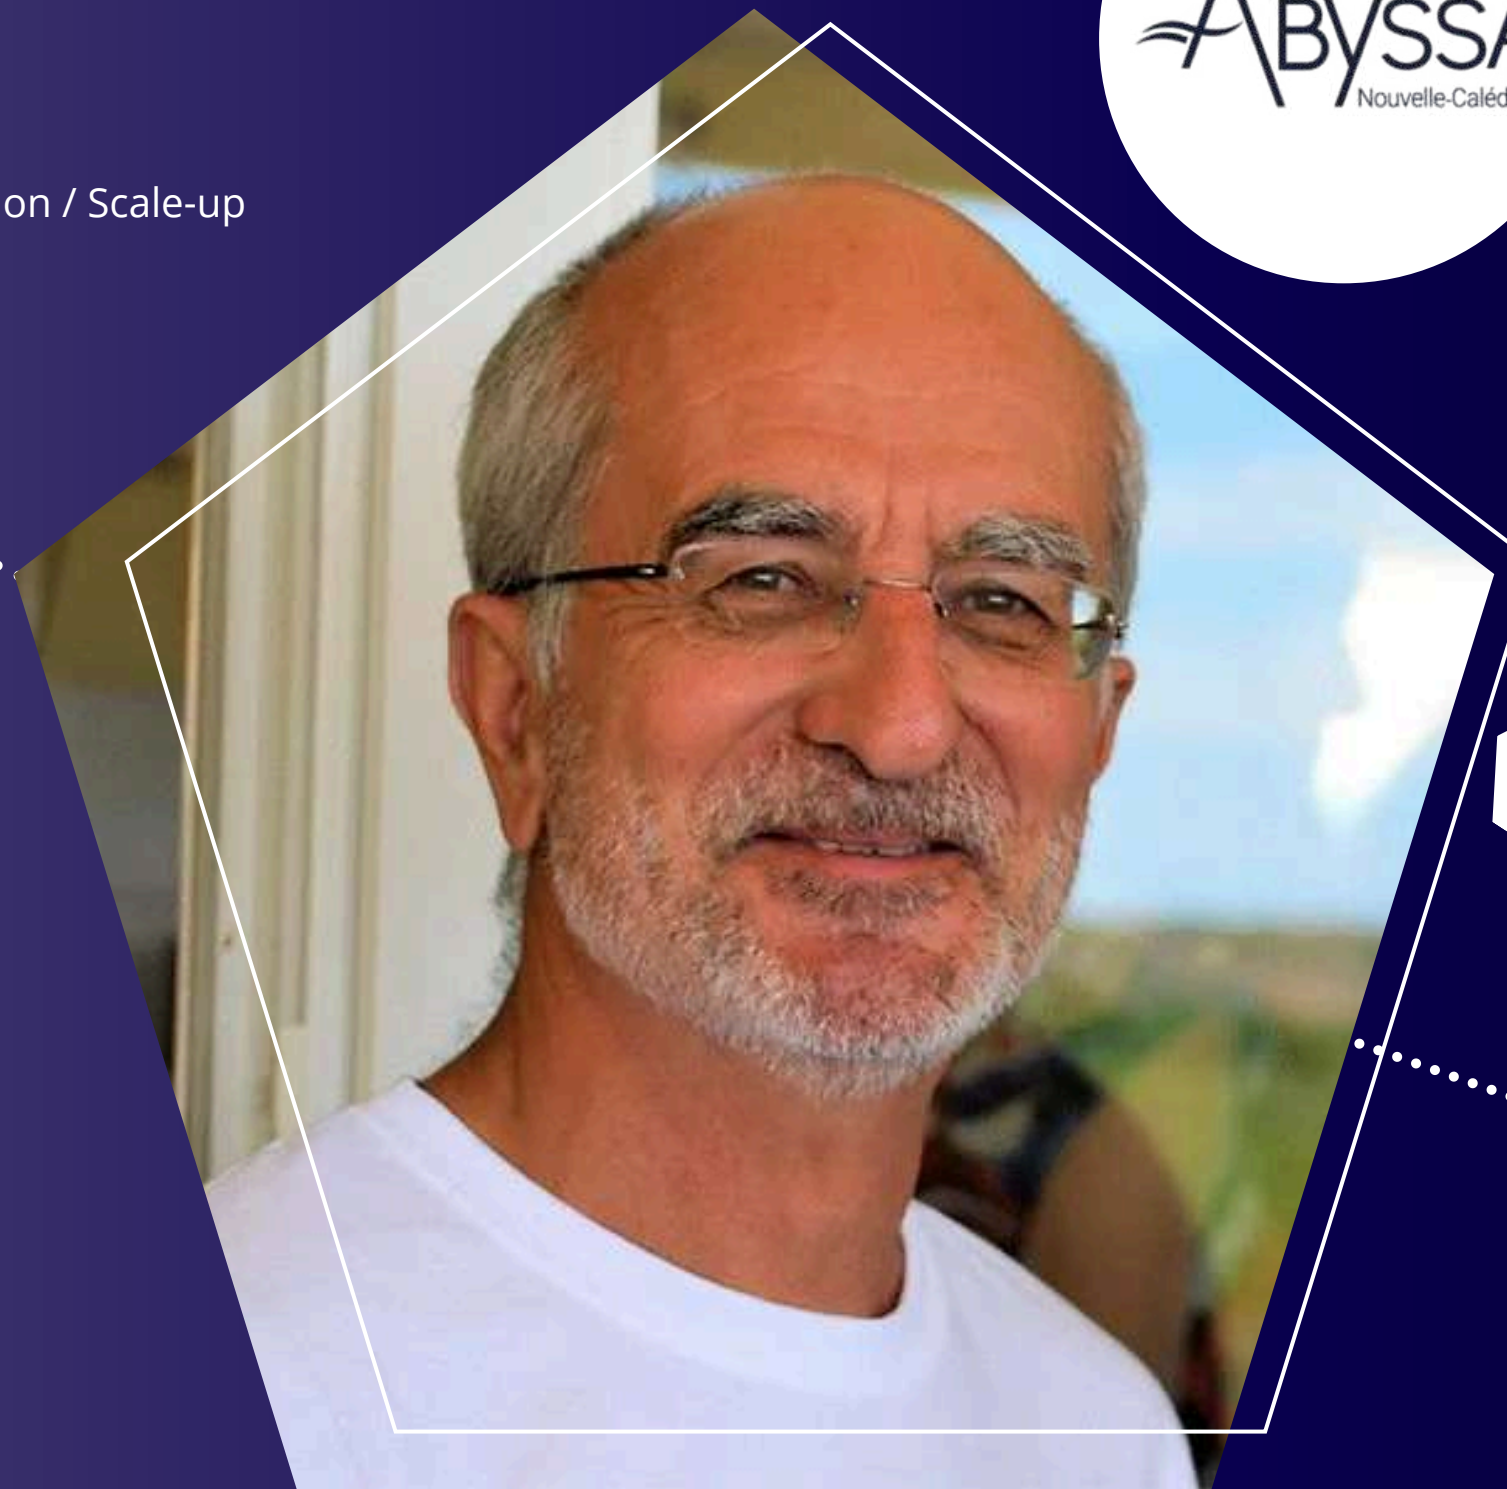

ABYSSA SAS develops autonomous underwater drones (AUVs) capable of exploring down to 6,000 metres depth.

Organised in fleets, they enable extended and non-intrusive exploration of the seabed.

The company operates in the fields of biodiversity, marine geosciences, energy and the detection of underwater infrastructure and objects.

It stands out for its expertise in mapping, localisation and inventory of deep-sea potential.

The New Caledonian subsidiary adapts these technologies to the challenges of Pacific territories.

Globale Marine

Decarbonising the Maritime Sector of Mining Vessels in New Caledonia

FOUNDER(S): Alain Giraud

TYPE OF ACTIVITY: B to B

SECTOR: Marine

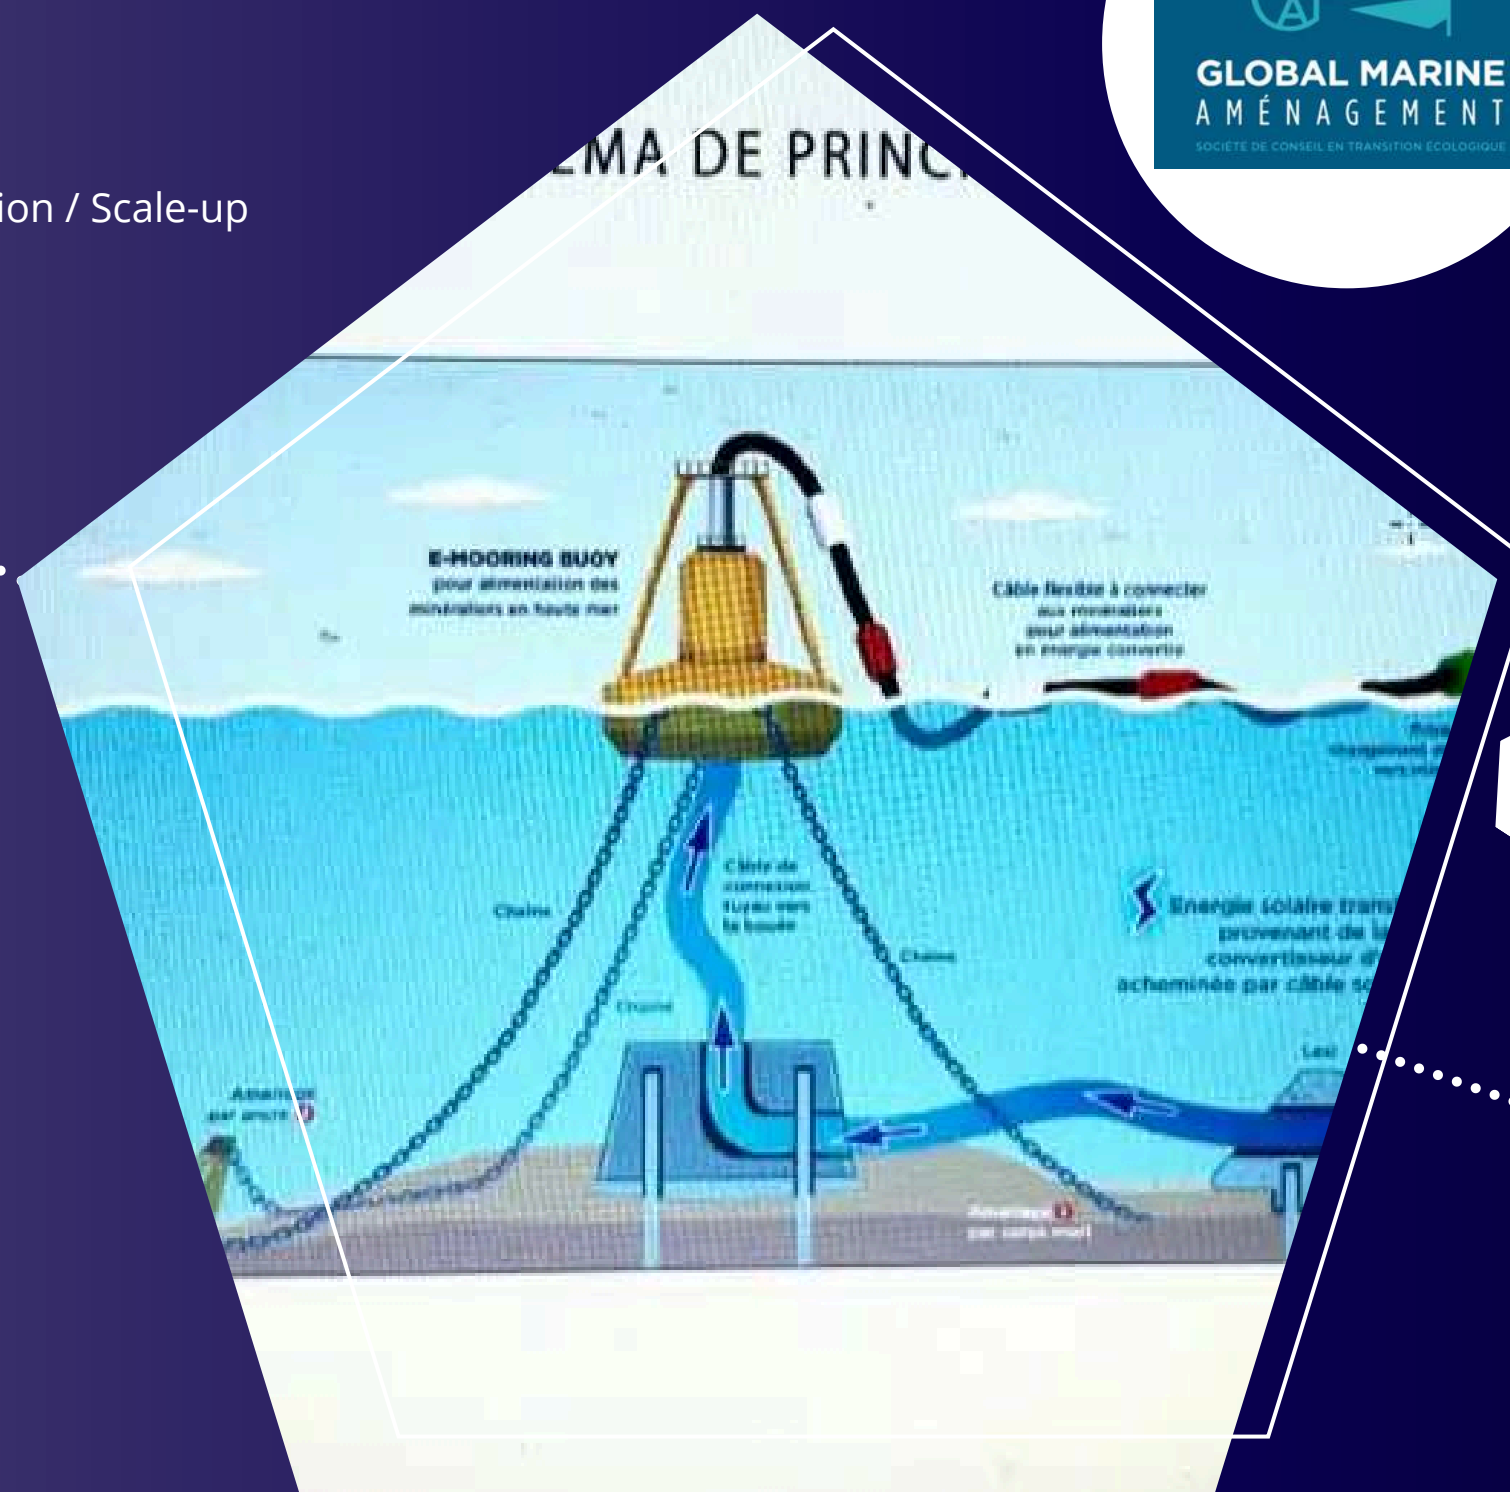

MATURITY: Acceleration / Scale-up

The eBuoy project is a solution to decarbonise the maritime sector of mining vessels in New Caledonia.

It is a mooring buoy sized for these types of vessels so they can retrieve, from this buoy, the energy carried by terrestrial electrical grids to power their cranes and meet all their onboard energy needs: refrigeration, air conditioning, water desalination...

Once the vessel is connected to the grid, it no longer generates any emissions.

HALOPHYTES SOLUTIONS NC

FARMING FOR THE FUTURE, FLAVOURS FROM HERE

FOUNDER(S): Pauline Bonaventure

TYPE OF ACTIVITY: B to B

SECTOR: Agriculture

MATURITY: Seed stage

Halos NC is the first New Caledonian company specialising in the cultivation and valorisation of halophytes — plants naturally adapted to saline environments, the most well-known in New Caledonia being sea purslane.

Founded by Pauline Bonaventure, HaloS NC operates a pioneering greenhouse located in Vallon Doré, by the sea, where it cultivates these rare species with recognised nutritional and cosmetic properties.

At the crossroads of innovative agriculture, local resource valorisation and sustainable development, the project paves the way for an unprecedented sector in the territory, with considerable potential for Pacific island markets and beyond.

ARBOTECH

REINVENTING PLANT PROPAGATION WITH SIMPLE AND SUSTAINABLE SOLUTIONS

FOUNDER(S): Louis Boudes

TYPE OF ACTIVITY: B to C

SECTOR: Agriculture

MATURITY: Established SME / Development

ARBOTECH modernises the air-layering technique with BotaBox, a practical and reusable device that attaches directly to branches to facilitate plant propagation.

Filled with substrate, the box creates optimal humidity conditions to promote rooting and produce a new plant at an advanced stage of maturity.

Flexible, adaptable and detachable, BotaBox enables simple, efficient and more sustainable agricultural practices.

NEOFLY

PRODUCING PREMIUM, LOCAL AND SUSTAINABLE NUTRIENTS FOR OUR AGRICULTURAL AND AQUACULTURE SECTORS

FOUNDER(S): Nicolas GUILLEMOT, Régis
BADOR, Matthieu MARCELLIER

TYPE OF ACTIVITY: B to B

SECTOR: GreenTech, AgTech, BioTech

MATURITY: Scale-up / Growth

A circular and industrial solution, shaped by the island context: bioconverting local organic waste using the *Black Soldier Fly* into high-value nutrients (proteins, lipids, fertilisers) to substitute imports and strengthen local primary production sectors (competitiveness, strategic autonomy, environmental footprint).

Neofly's model relies on small, agile, replicable factories, running counter to macro insect models, specifically adapted to Pacific region territories.

BIIFOR

TRANSFORMING DATA INTO STRATEGIC DECISIONS

FOUNDER(S): Olivier Dabout

TYPE OF ACTIVITY: B to B

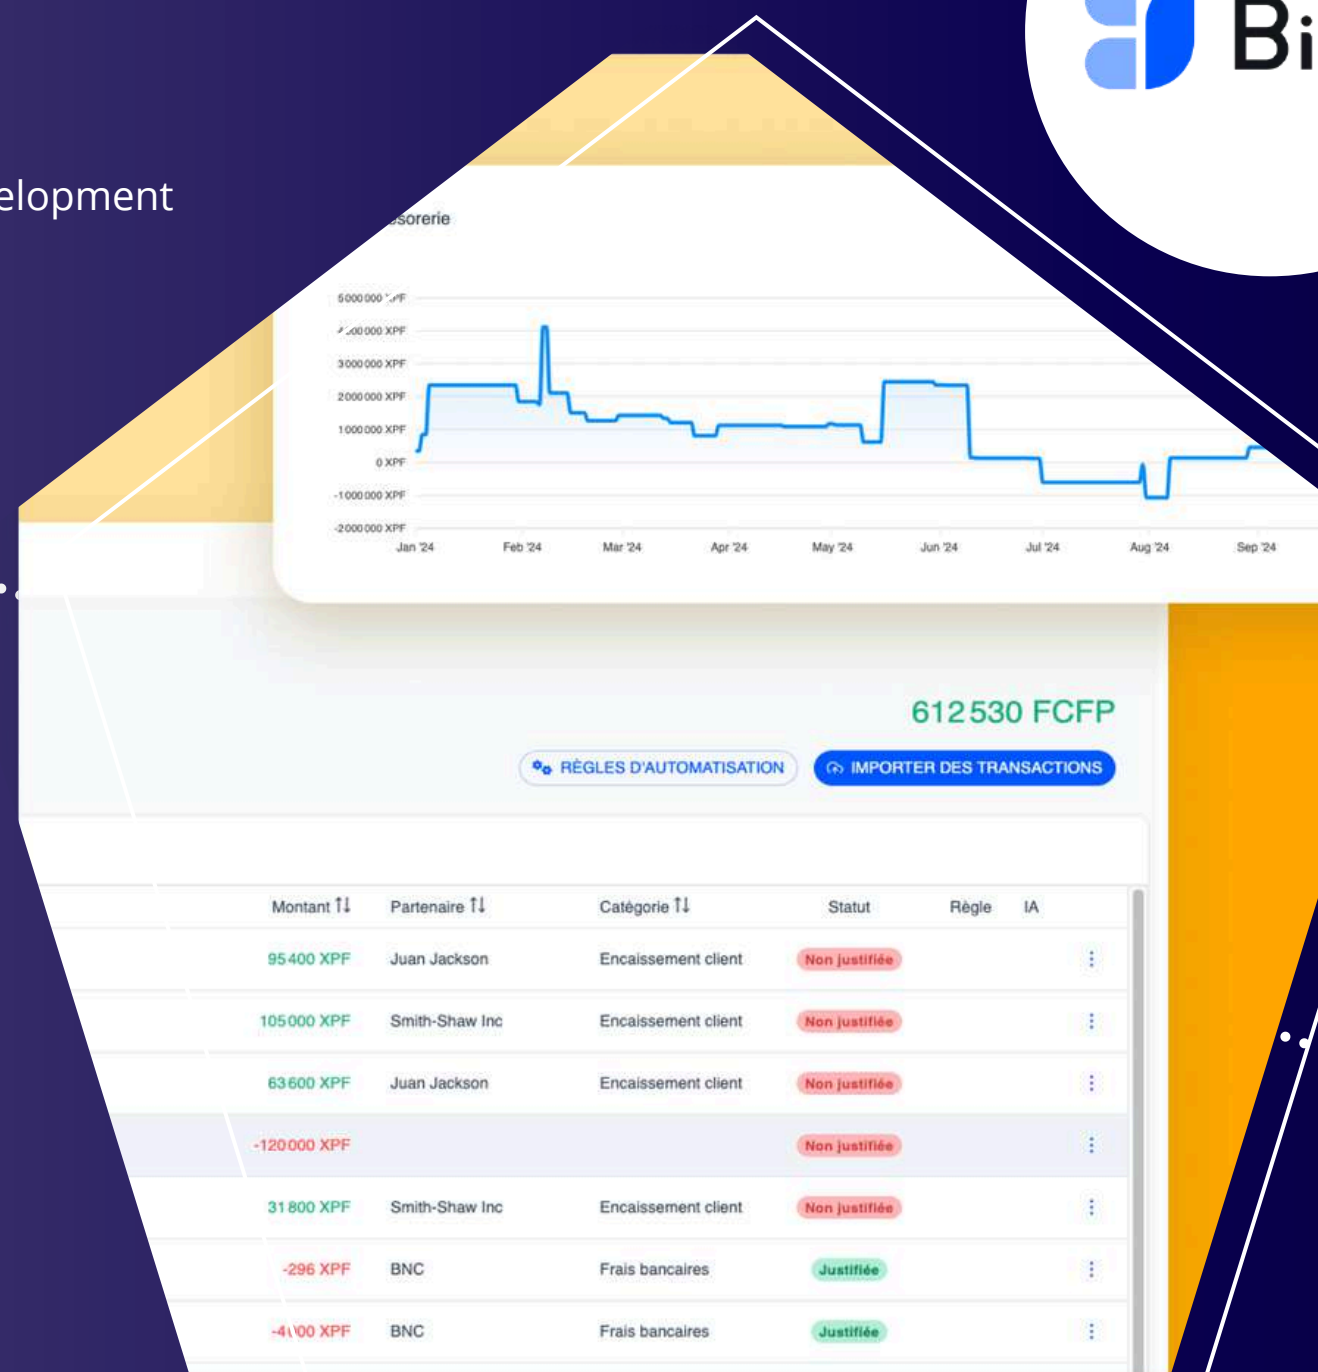

SECTOR: Management

MATURITY: Startup / Development

Biifor is the first SaaS accounting management solution designed specifically for New Caledonian businesses. Founded by Olivier Dabout, a chartered accountant with 20 years of experience in the territory, Biifor addresses a very local reality: Pacific Franc, TGC, Caledonian banks — where international tools stumble on our specificities, Biifor adapts natively.

Thanks to real-time bank connection, automatic invoice recognition and artificial intelligence, what used to take 15 to 20 hours of accounting per month now takes less than 2 hours. A free invoicing module is offered to newly created businesses.

DIGIT

**SOVEREIGN SOFTWARE PUBLISHING,
DESIGNED IN NEW CALEDONIA**

FOUNDER(S): Julien COZZI

TYPE OF ACTIVITY: B to B / B to G

SECTOR: Digital and AI

MATURITY: Growth stage

DIGIT is a New Caledonian software publishing company with high added value.

We design, develop and operate digital solutions conceived in New Caledonia, for the territory's organisations and the Pacific zone. Our conviction: at a time when dependence on major foreign players is becoming a strategic risk, the territory needs locally controlled tools, locally hosted, and designed for its realities.

Our publishing expertise places people and real usage at the heart of every product: clear interfaces, a true product culture, and long-term support.

MATURITY: Startup (example)

Testeum is a fully automated participatory testing SaaS platform, enabling companies to test their applications and websites quickly and affordably.

It directly connects digital solution creators with a community of testers, while simplifying and automating the entire process.

Its goal is to make software testing accessible, fast and efficient for everyone.

KEIDESK

ONE TOOL TO STRUCTURE YOUR COMMUNICATION,
DRIVE YOUR BUSINESS AND MOVE FORWARD WITH CLARITY.

FOUNDER(S): Célie GIBUS

TYPE OF ACTIVITY: B to B

SECTOR: SaaS / Digital communication / Entrepreneurial
productivity

MATURITY: In development

Kei Desk is a SaaS application dedicated to entrepreneurs and SMEs, designed to simplify, structure and drive their communication and business development within a single tool. Today, entrepreneurs juggle multiple tools, lack clarity and waste time. Kei Desk centralises actions, structures strategy and provides a clear vision to help leaders move forward efficiently.
